

PROJECT SPOTLIGHT: NEVADA NORTHERN RAILWAY NNRY - RAILCAR #1023 ELY, NV

One day, The Northern Nevada Railway (NNRY), noticed that railcar #1023 needed a new roof. The existing roof had begun to sag and was creating structural issues.

John McDonnell of NNRY, reached out to ASC Building Products through the Ask ASC webform, and after discussing his needs with Technical Services rep, Jeff Haddock; a decision was made. They wanted a roof that would be both durable and dependable for years to come.

The new metal roof was going to be Skyline Roofing® in the 26ga color, Rustic Red. With the aid of ASC Building Products' online Distributor Search, John was able to identify a local distributor and place the order with ease with Bath Lumber of Ely, NV.

“ENJOYED WORKING WITH ASC BUILDING PRODUCTS.”
– JOHN MCDONNELL, NNRY – ELY, NV
